Code Opens Listing

Methodology and Approach
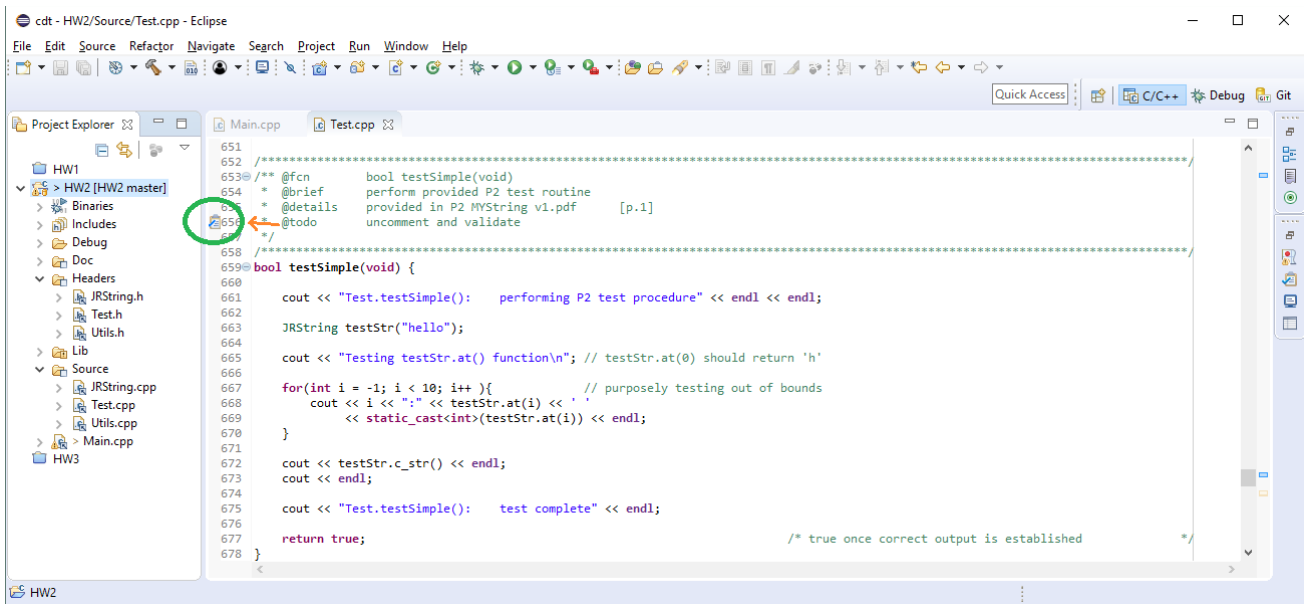

Date: 2/7/18

Revision: 1.0

Author: Justin Reina
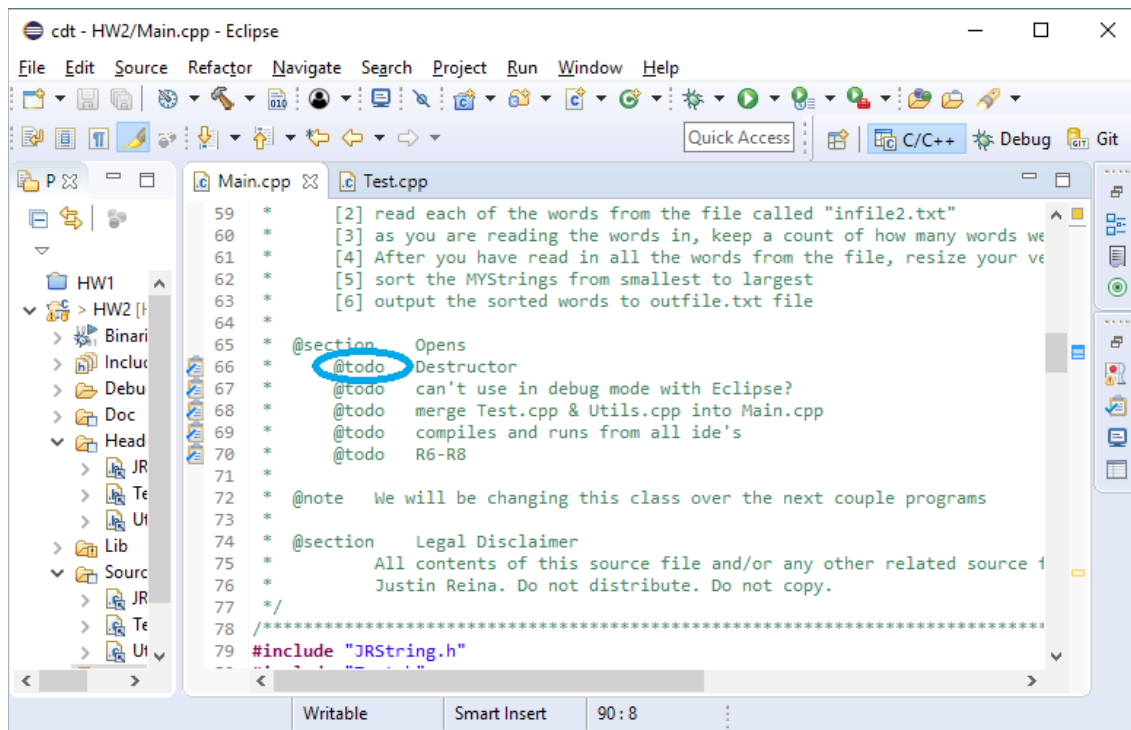

Summary:

   The Task view in Eclipse is used for tracking project opens ('todos') and a simple methodology is shown here for use.

1 Item Insertion

- Listing of single items (prefix with '*@todo*')

- Listing of list items ('*@section Opens*', prefix each with '*@todo*')

2 Item Review

- All items listed in source (*.cpp, *.c, *.h) will be included in the Eclipse Task view automatically

  - Window-> Show View → Tasks

  - note that the colored items listed here match the items shown on first page
